EDUCATION

University of California, Berkeley, Haas School of Business — Berkeley, CA

Master of Business Administration (MBA), Scholarship Recipient; expected graduation 05/28 — Aug 2026 - May 2028

- **Leadership & Clubs:** Haas Tech & AI Club; PM Club; Digital Media & Entertainment Club; Cohort's Academic Rep

Maastricht University — Maastricht, NL

Bachelor of Science in Data Science and Artificial Intelligence — Aug 2019 - Sep 2022

- **AI Research Intern, SENTEA (fiber optics sensing, 2021)**: built ML models with lead engineers to improve the sensing system's signal processing, lifting prediction accuracy 15%; presented results to the COO
- **Data Science Intern, ASML (2018)**: analyzed global simulation data using SQL to seed the SPDM data-mining tool

EXPERIENCE

Plat4mation | Europe's largest ServiceNow elite partner *(750+ employees, 13 countries)* — Belgium, EU

Associate Consultant *(Dec 2022 - Dec 2024);* ***Consultant*** *(Jan 2025 - Sep 2025);* — Dec 2022 - Dec 2025

Senior Consultant (Promoted in 3 years vs. 5-year norm) *(Oct 2025 - Dec 2025)*

Product Discovery & Delivery

- Doubled adoption in 2 years by owning the end-to-end roadmap for a leading Belgian HR provider's B2B payroll product serving ~2,000 client businesses; took 4 modules 0-to-1 for new regulations, all on deadline, by writing technical user stories & acceptance criteria, running dev sprints, and designing & executing the test cases
- Led user research across 150 interviews and 3M+ records, turning user pain points into recommendations to consolidate siloed service workflows into one platform; cut case resolution time 40%
- Designed an impact-vs-effort prioritization framework to align 3 competing stakeholder groups (legal, customer, IT) on a €360K platform release budget; optimized resource allocation and saved ~€100K in year 1
- Mapped user journeys and diagnosed platform failures across CRM and IT workflows to redesign request routing; automated manual handoffs, eliminating ~€150K in tech debt and cutting 30% of error-driven rework
- Spotted recurring onboarding rework beyond my project's scope; secured funding, designed a reusable technical framework & led its build, cutting per-onboarding cost 50% across the next 6 & saving ~€200K

AI & Prototyping

- Built the digital-transformation roadmap for a semiconductor R&D leader growing by 2,000 staff in 2 years; found the data & security concerns stalling a €2M GenAI license deal & unblocked it with a C-suite sandbox demo
- Owned product decisions across 5 ML models & 500K+ cases, from discovery and training-data strategy to model evaluation, to scale case-triage automation for a 35-person operations team & cut manual triage time 30%
- Dug into an ML model with strong test scores, traced overfitting to corrupted data & pushed back on its launch; specified a new data field for retraining, preventing 1,500 misrouted cases & ~€45K/month
- Lifted Copilot adoption from 30% to 80% in 2 weeks by spotting low post-rollout engagement in usage metrics & designing a grassroots enablement program: prompt-engineering and tooling sessions for 70 consultants

Pilots & Adoption

- Drove 70% adoption across 20+ EU directorates on one multi-tenant platform; set privacy & data-segregation requirements with architects so directorates shared workflows but not data; MVP pilots in 2.5 months
- Co-designed the firm's first embedded team model with the board, and its success metrics with sales, for its largest account (~€2M ARR); led the 15-person pilot team; client renewed & model scaled to 5 accounts

Blue Jay Eindhoven | University-backed deep-tech venture building autonomous drones — Eindhoven, NL

AI Team Lead & Architect *(promoted from Software Engineer)* — Jan 2018 - Jul 2019

- Founded and led a 7-engineer AI team to ship on-device human-detection models for autonomous search-and-rescue drones (on NVIDIA Jetson Nano); partnered with SAS Analytics and Philips, demoing live at PSV Stadium

ADDITIONAL

- **AI-built prototypes:** Baby Perfect, baby-name 'futures' app (2nd Prize, Most Unethical Hackathon, SF Tech Week); Living Storyboard, real-time video previz tool (3rd Prize, Orbis challenge), charchika-sinha.vercel.app
- **Community:** Led ed-tech adoption in rural Indian schools; engagement 64%→80%, attendance +23% in 1st month
- **Creative:** Head of Marketing, ASPIRA (audience research, personas, competitive positioning); freelance art director; co-directed a national Vodafone x Ziggo TV campaign (75K+ new logins, 250K+ link clicks)
- **Technical:** Python, SQL, JavaScript, TensorFlow; Claude Code, Lovable; ServiceNow certified (CSA, CIS-CSM)
