EDUCATION

University of California, Berkeley, Haas School of Business — Berkeley, CA
Master of Business Administration (Scholarship Recipient) — Aug 2026 - May 2028

- **Haas Tech & AI Club; Haas PM Club; Digital Media & Entertainment Club; Cohort's Academic Rep**

Maastricht University — Maastricht, NL
Bachelor of Science in Data Science and Artificial Intelligence — Aug 2019 - Sep 2022

- **AI Research Intern, SENTEA (fiber optics sensing)**: built ML models with lead engineers to augment the interrogator's signal-processing, improving prediction accuracy 15%; presented results to the COO
- **Data Science Intern, ASML (2018)**: analyzed global simulation data using SQL to seed the SPDM data-mining tool

EXPERIENCE

Plat4mation | Europe's largest ServiceNow elite partner *(750+ employees, 13 countries)* — Belgium, EU
Associate Consultant *(Dec 2022 - Dec 2024);* ***Consultant*** *(Jan 2025 - Sep 2025);* — Dec 2022 - Dec 2025
Senior Consultant (Promoted in 3 years vs. 5 year norm) *(Oct 2025 - Dec 2025)*

Product Ownership & Roadmap

- Doubled the product's adoption in 2 years by owning the end-to-end roadmap for a leading Belgian HR provider's product serving ~2,000 client organizations; took 4 modules 0-to-1 to help adopt regulatory changes by leading discovery and the devs through build, partnering with the client's IT teams for feasibility checks and testing
- Synthesized 3M+ customer records and 150 user interviews to consolidate siloed service workflows into a unified platform, eliminating redundant maintenance costs and enabling shared insights; cut case resolution time 40%
- Designed an impact-vs-effort prioritization framework to align 3 competing stakeholder groups (legal, customer, IT) on a €360K platform release budget; optimized resource allocation and saved ~€100K in year 1
- Mapped user journeys and diagnosed platform failures across CRM and IT workflows to redesign request routing; automated manual handoffs, eliminating ~€150K in tech debt and cutting 30% of error-driven rework

AI & Data Products

- Drove product decisions across 5 ML models & 500K+ cases, from discovery and training-data strategy to error analysis, to scale case-triage automation for 35-person operations team & cut manual triage time 30%
- Diagnosed overfitting in an ML model, despite strong test scores, caused by corrupted training data; influenced leadership to delay deployment, preventing 1,500 misrouted legal cases & ~€45K in remediation costs per month
- Lifted Copilot tool adoption from 30% to 80% in 2 weeks by identifying low post-rollout engagement & designing a grassroots enablement program: prompt-engineering and tooling sessions for 70 consultants across teams

Strategy & Cross-functional Leadership

- Unblocked a €2M annual AI platform license by diagnosing the training-data and security concerns stalling adoption; built and demoed a live sandbox that won over the C-suite and put AI on their roadmap
- Identified recurring onboarding rework across departments, secured resources to absorb 1st build and shipped a reusable blueprint to standardize the process; cut per-onboarding cost 50% across the next 6 & saved ~€200K
- Drove 70% stakeholder adoption across 20+ EU directorates from fragmented IT systems onto a unified platform; structured discovery across competing security & political concerns, shipping tailored pilots in 2.5 months
- Co-designed the firm's first embedded team model with the board for its largest account (~€2M ARR); led a 15-person team in the first engagement; the client renewed and the model scaled to 5 accounts in year 1

Blue Jay Eindhoven | University-backed deep-tech venture building autonomous drones — Eindhoven, NL
AI Team Lead & Architect *(promoted from Software Engineer)* — Jan 2018 - Jul 2019

- Founded and led a 7-engineer AI team to ship on-device human-detection models for autonomous search-and-rescue drones (on NVIDIA Jetson Nano); partnered with SAS Analytics and Philips, demoing live at PSV Stadium

ADDITIONAL

- **Vibe-coded builds:** Baby Perfect, baby-name 'futures' app (2nd Prize, Most Unethical Hackathon, SF Tech Week); Living Storyboard, real-time video previz tool (3rd Prize, Orbis challenge), charchika-sinha.vercel.app (website)
- **Community:** Led ed-tech adoption in rural Indian schools; engagement 64%→80%, attendance +23% in 1st month
- **Creative:** Freelance illustrator & art director**;** co-directed a national Vodafone x Ziggo TV Campaign; trying to keep up with (almost) every new AI design tool that launches
- **Technical:** Python, SQL, R, JavaScript, Next.js, TensorFlow, Claude Code; ServiceNow certified (CSA, CIS-CSM)
